NOTES TO THE FINANCIAL STATEMENTS FOR NINE MONTHS ENDED 30 SEPTEMBER 2016 -PART A - EXPLANATORY NOTES PURSUANT TO GUIDELINES ON FINANCIAL REPORTING FOR LICENSED ISLAMIC BANK (BNM GP8-1) ISSUED BY BANK NEGARA MALAYSIA

#### 1. General information

#### a) Perfomance Review

The Economic Entity and the Bank registered a profit before tax of RM5.97m for the nine months period ended 30 September 2016.

The Economic Entity and the Bank's gross financing and advances stood at RM1.46b whilst total Deposit at RM2.03b.

#### b) Business Plan and Outlook for 2016

Global growth is projected to slow to 3.1 percent in 2016 before recovering to 3.4 percent in 2017. The forecast reflects a more subdued outlook for advanced economies following the June U.K. Brexit and weaker-than-expected growth in the United States.

Growth in emerging market and developing economies is expected to strengthen slightly in 2016 to 4.2 percent after five consecutive years of decline, accounting for over three-quarters of projected world growth this year.

The World Bank expects Malaysia's gross domestic production (GDP) to slow to 4.2% in 2016, compared to 5% in 2015, on the back of weak global demand for oil and manufactured exports.

The bank said growth will be driven by private consumption growth, but added that consumption is expected to slow amid a softer labour market and ongoing adjustments to the rising cost of living. Going forward, the Malaysian economy faces risks emanating mainly from external developments. They include uncertainty over the trajectory of economic growth in the global economy, and potential volatility in financial markets. *(World Bank)* 

In line with its vision to empower business with Islamic banking values, the Economic Entity and the Bank will continue to leverage on its Middle East connection to create and bridge business opportunities between Malaysia and the Middle East as well as regionally, especially for funding GLCs in the sectors of oil and gas, shipping, aviation, infrastructure as well as real estate.

The Economic Entity and the Bank will continue to enhance and preserve its performance and also ensure sustainability going forward. Strategies and approaches will constantly be reviewed to suit business needs, customers' expectations and business requirements, with appropriate risk mitigations in place while ensuring compliance with regulatory requirements.

## 6. Derivative financial instruments

7.

The table below shows the fair values of derivative financial instruments, recorded as assets or liabilities, together with their notional amounts. The notional amount, recorded gross, is the amount of derivative's underlying asset, reference rate or index and is the basis upon which change in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at the period/year end and are indicative of neither the market risks nor the credit risk.

## 18. Commitments and contingencies

In the normal course of business, the Economic Entity and the Bank make various commitments and incurs certain contingent liabilities with legal recourse to their customers. No material losses are anticipated as a result of these transactions, hence they are not provided for in the material statements.

The movements of allowances for impaired financing and advances are set out in Note 5.

#### Credit Risk Mitigation (CRM) Disclosures

In mitigating its credit exposure, the Bank currently employs the cash collateral (one of the form of collaterals under Credit Risk Mitigants), which provides 0% risk weights. Other form of collaterals such as financing facility against charges over residentail and commercial properties, pledged over shares, and supports in the form of debentures, assignments and guarantees are not taken into consideration as CRM and are therefore assigned with 100% risk weights.
